

### Product Specifications

KV3eco is a thermosetting plastic material reinforced with glass fiber. High-quality raw materials and a special manufacturing process give **KV3eco** its exceptional characteristics.

### Material Specifications:

- Long-term resistance to temperature and pressure
- Excellent dimensional stability
- No risk of delamination

### Fields of Application

**KV3eco** combines excellent insulating properties with exceptional dimensional stability, even when subjected to extreme loads and stresses.

It is installed on heated presses and used as an insulator for molds.

### Supply Details:

- **Standard Thickness:** 5-30 mm
- **Premium Finish Available**

The values in this technical data sheet are standard values and are not part of any contract. Specifications may change depending on modifications in the operating environment.
