

Special Finish for High Precision Requirements

This **special finish** was developed to meet **tighter tolerance specifications** in terms of precision.

Key Features:

- **Increased parallelism to 0.02 mm**, with a thickness tolerance of **0.02 mm**.
- **Applicable** to all **Brandeburger® insulating materials**, up to a **maximum plate size of 1500 mm x 1250 mm**.

Advantages:

- **Uniform dimensional precision** across the entire insulating plate structure.
- **Optimization of quality** in **precision molding** applications.
- **Enhanced press plate alignment precision** with the insulating plate.

The information in this publication, as well as any additional information provided to users, is based on experience and is shared to the best of our current knowledge. However, due to numerous factors beyond our knowledge and control that may affect the use of these products, no warranties are provided or implied regarding this information. The operating limits presented in this publication do not imply that these values can be applied simultaneously. Do not use the product at the maximum temperature and pressure values simultaneously. The maximum temperature is suitable only for short-term exposure under specific conditions. Specifications are subject to change without prior notice. The picture in the DS may not accurately depict the exact color and/or markings of the product.
