PLANICHEM SICHEM SOLUTIONS

Product Specifications

\$4000 is a thermosetting plastic material reinforced with glass fiber.

Material Specifications:

- Long-term temperature resistance
- Excellent insulating capability
- High compressive strength

Fields of Application

\$4000 is used as an insulating sheet or mechanical component in presses for the rubber, plastic, and wood molding industries.

\$4000 has a major advantage compared to other inorganic insulating materials: it provides the same insulating effect with a reduced thickness.

Supply Details:

- Standard Thickness: 5-30 mm
- Premium Finish Available

The values in this technical data sheet are standard values and are not part of any contract. Specifications may change depending on modifications in the operating environment.

The information in this publication, as well as any additional information provided to users, is based on experience and is shared to the best of our current knowledge. However, due to numerous factors beyond our knowledge and control that may affect the use of these products, no warranties are provided or implied regarding this information. The operating limits presented in this publication do not imply that these values can be applied simultaneously. Do not use the product at the maximum temperature and pressure values simultaneously. The maximum temperature is suitable only for short-term exposure under specific conditions. Specifications are subject to change without prior notice. The picture in the DS may not accurately depict the exact color and/or markings of the product.
