

Product Specifications

XGD 25 is a thermosetting plastic material reinforced with glass fiber.

Material Specifications:

- Higher insulating capability compared to standard insulating materials
- High-temperature resistance
- Good mechanical strength

Fields of Application

XGD 25 is primarily used in the mold and equipment manufacturing industry, where excellent insulation is required.

Supply Details:

- **Standard Thicknesses:** 6; 30 mm
- **Premium Finish Available**

The values in this technical data sheet are standard values and are not part of any contract. Specifications may change depending on modifications in the operating environment.
